

Our Goal:

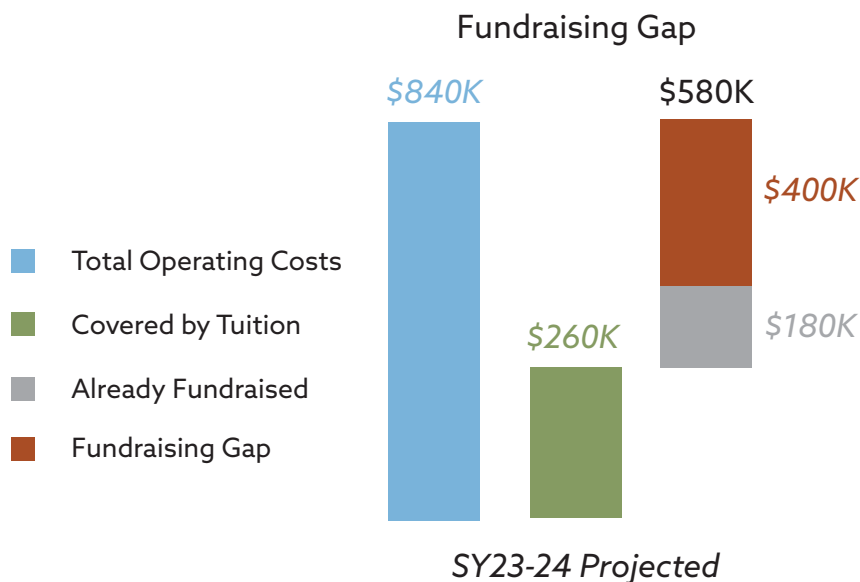

Keeping Catholic Education an Option for Families

"The greatest challenge to Catholic education in the United States today, and the greatest contribution that authentically Catholic education can make to American culture, is to restore to that culture the conviction that human beings can grasp the truth of things, and in grasping that truth can know their duties to God, to themselves and their neighbors." – St. John Paul II

If, as St. John Paul II said, Catholic education in the United States is an investment in our culture and in the Church, and this school truly creates disciples for Christ, then it is a worthy and far-reaching investment for us as Catholics to help make Catholic education an option for families. In the spring of 2021, we surveyed hundreds of families across Northern Colorado parishes. When asked what they were looking for in a Catholic high school, ~50% said "tuition that isn't an inhibitor." The study also showed that most families are willing and able to pay a tuition of \$7,000 to \$8,000, though a significant portion (at least 40%) would need tuition assistance of varying degrees.

Our Fundraising Goal This Year

Remaining Fundraising Gap for SY23-24

This fundraising campaign is meant to fill the gap between the true cost to educate a student and the cost of tuition. Simply put, we fundraise so that we can keep tuition affordable for families so that all students might have the opportunity for an authentically Catholic education during this crucial stage of their life.

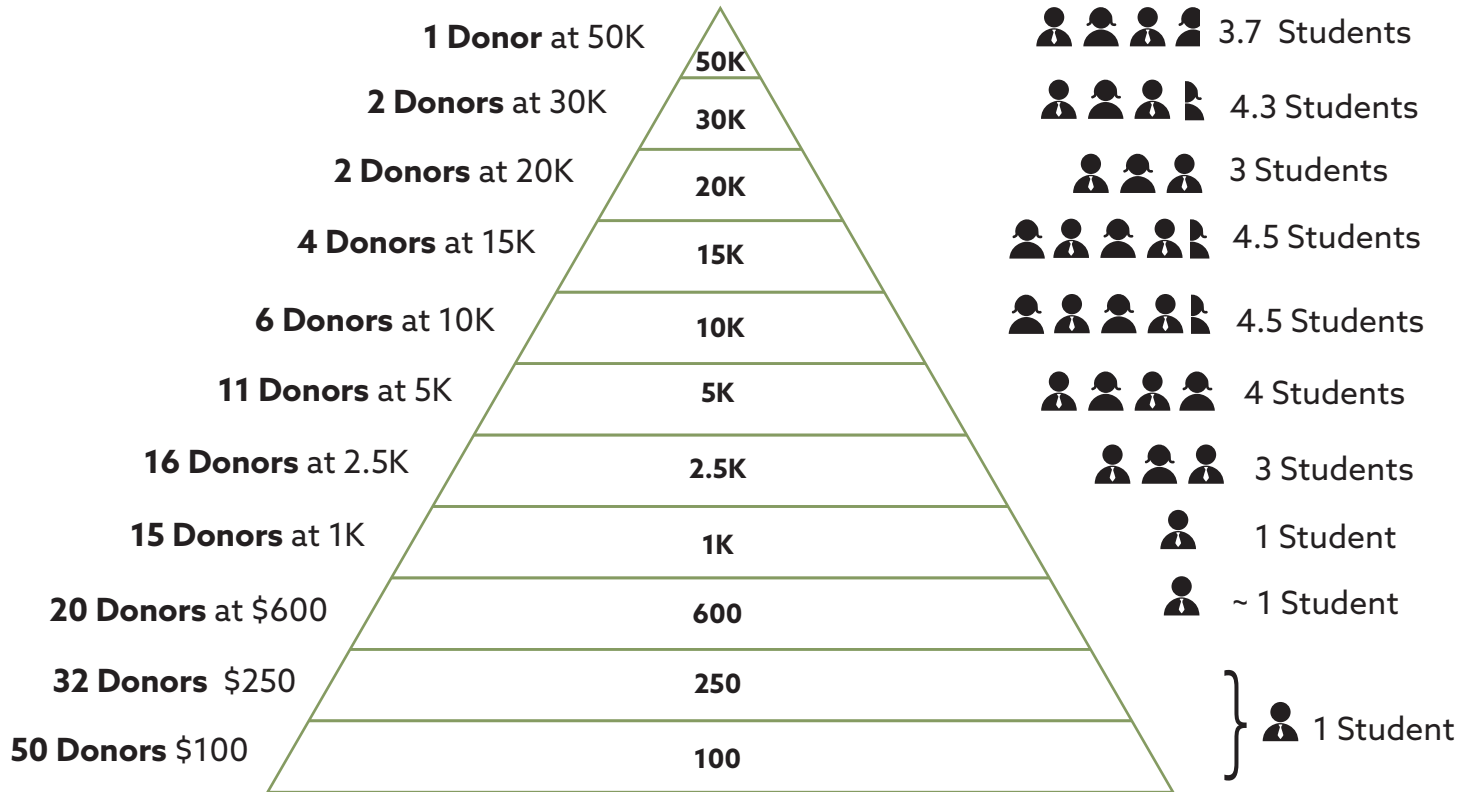

**All numbers are estimated according to anticipated projections.*

\$13,500 gap per student needed.

Thanks to our generous donors we already have approximately 13 additional students funded.

29 total students remaining needing donors

Will you help us reach our goal?

We would be honored if you would prayerfully consider partnering with JPIIHS at one of the levels above. Together we can bring the light of Christ to so many students and families in Northern Colorado for generations to come!

*All numbers are estimated according to anticipated projections.
